APPLICATION OF WHARFAGE RATES

(2) Non-Containerized-Cargo:

- (a) Wharfage will be assessed charges in cents per 1,000 kilograms or cubic meter as specified in Items 07010 through 07997.3; or according to the vessel's manifest, on whichever basis the water freight charges are assessed.
- (b) On cargo moving on other than a weight or measure basis (i.e. per package, per unit, combination weight and measure basis, etc.) wharfage will be assessed in cents per 1,000 kilograms or cubic meter, whichever will result in the greater revenue.
- (c) Commodities not specifically named in this section will be subject to the Cargo NOS rates in Items 07010 through 07997.3
- (d) Cargo which is not covered by a regular commercial shipping line's manifest, and is not moving under regularly established commercial rates 05105 published in commercial tariffs, but is moving to or from ports that are served by vessels operating in regular trade routes under commercial tariffs, shall be assessed wharfage on the same basis as the freight charges on such cargo would have been assessed on vessels operating in such regular trade routes under commercial tariffs.
- (e) Transferred cargo as defined in Item 01280, received at a Port of Oakland terminal facility will be assessed the applicable wharfage on the basis as cargo moving by vessel at the rate of \$135.00 per twenty-foot equivalent container unit (TEU) prior to leaving the Port terminal. Transferred cargo moving by land vehicle from one Port of Oakland terminal facility to another will be assessed only one wharfage charge at \$135.00 per TEU which will be assessed at the final Port of Oakland terminal, unless a Port of Oakland wharfage charge is not applicable at that terminal in which event the charge will be assessed at the first terminal. However, transferred cargo may be assessed the lower rates in items 06200 and 06900 through 06905 when the owner, agent or other person in charge of such cargo provides the Port written verification that the commodities are those specifically named in those items.

APPLICATION OF WHARFAGE RATES

(f) Transshipped cargo as defined in Item 01285, discharged and assessed applicable wharfage at one Port of Oakland terminal facility and directly reloaded to a vessel at the same or another Port of Oakland terminal will be assessed the applicable wharfage at the initial discharge only. The applicable wharfage on transshipped cargo will be assessed in accordance with Items 06200 through 06905 whether assessed at the initial discharge, or at the final Port of Oakland terminal because no wharfage charge was applicable at the initial terminal. Transshipped commodities will be subject to Port audit and verification. In the event such audit finds the transshipped commodities are not specifically named under Items 06200 and 06900 through 06905 then wharfage will be assessed under the rates for Cargo, NOS in Item 06400. When transshipment is substituted for direct call of vessel, the charges on cargo so handled will be the same as that applicable to cargo handled on direct call.
